From Church Guide by J.H.A. Charles, M.A. (Vicar) dated 1959.

There are two things of great interest in the ringing chamber of the tower. One is the carved Royal Arms belonging to the church which, unfortunately was too large for it to be able to be rehung in the new church, being nine feet high. It is of carved oak and dates from the reign of Charles II.

There are very few of these Royal Arms still existing, and a recent book on heraldry lists this among 22 to be found in the country (p.12). The other is an account of John Wesley which is of such historic interest that it has been framed:// "On Sunday, December the 28th, 1788., Two Sermons were preached in

this Parish Church for the benefit of forty-eight poor children belonging to the St Ethelburga Society; that in the morning by the Rev. George Patrick, LL.D.; and that in the afternoon by the Rev. John Wesley, M.A., from the words in the service, "His commandments are not grievous." The congregation was very large. // While Mr. Wesley, then in his eighty-sixth year, was putting on his gown in the vestry, he said to Mr. Thomas Letts, a Steward of the Charity, "It is above fifty years, Sir, since I first preached in this Church. I remember it from a particular circumstance. I came without a sermon, and going up the pulpit stair I hesitated and returned to the vestry under much mental confusion and agitation. A woman who stood by noticed my concern and said, 'Pray Sir, what is the matter?' I replied, 'I have not brought a sermon with me'. Putting her hand on my shoulder she said, 'Is that all? Cannot you trust God for a sermon? The question had such an effect on me that I ascended the pulpit, preached extempore with great freedom to myself and acceptance to the people, and have never since taken a Written Sermon into the pulpit."
